Executive Summary

Opportunity

Problem

Problem Worth Solving

In the rapidly evolving landscape of generative AI in the music industry, artists often find themselves lacking control over three crucial aspects: Compensation, Credit, and Consent.

Solution

First Rule addresses this problem by empowering artists with tools and platforms that return control to their hands. Our ecosystem, comprising Artist Vault™, Co-Writer™, and ClearVoice™, not only secures and monetizes voiceprints, but also fosters AI-assisted musical creativity and manages rights for AI-generated works, respectively. This aligns with our '*Humans First*' motto, ensuring artistic autonomy and fair compensation.

Market

The global music industry- in net revenues, which account for the share taken by rightsholders- is estimated at \$65.1 billion 2023 in annual revenue, and it's seeing a surge in vocal asset licensing and monetization as well as generative music content creation, especially from well-known artists.

We primarily focus on two key segments:

1. Aspiring-to-established-to-famous singers, offering them control and creative freedom in monetizing their unique vocal styles
2. Voiceprint integrators/fans, including music producers, independent music publishers, interactive media companies, and hobbyists. Our target is to onboard 50 major artists in the first year and expand our user base to over 100 million in five years. First Rule's approach aligns with the increasing

demand for personalized vocal and musical content and positions us to revolutionize the music technology market.

Competition

1. Mint Songs: A blockchain-based platform for artists to mint and distribute unique songs as NFTs, earning crypto rewards.
2. Elf.Tech: Grimes collaborates with TuneCore and CreateSafe for AI-driven music production, allowing users to transform their own singing recordings into Grimes' voice.
3. Controlla.XYZ: A music platform connecting artists with fans, providing monetization opportunities and building a loyal fan base.
4. Voice-Swap.AI: Easily transform your vocals to match the style of chart-topping singers.
5. YouTube Short's Lyria Experiment: Shorts, YouTube's attempt to stay competitive with TikTok, has created the Lyria experiment (currently in beta) which allows a select amount of established YouTuber's to pick one of nine famous signers (Troye Sivan, T-Pain, and others) to sing novel lyrics and melodies over an AI generative song based on their text prompt and then add it to their YouTube video as a sound.
6. Kits.AI by Arpeggi Labs: Generate your own AI voices in one click, or transform your voice using our growing library of officially licensed AI voices. Unfortunately, Kits.AI has multiple stripped and illegally cloned voices in their library + very few known artists in the approved and licensable voiceprint library.

Why Us?

First Rule's Key Advantages:

While several companies are racing to capitalize on the emerging trend of AI content generation using vocal cloning and generative voice (vocaloid) technologies by stealing and leveraging artists' and creators' voiceprints (think Napster, but voiceprints), First Rule takes a unique approach by prioritizing the artists – *humans and humanity first*. We firmly believe in giving artists complete autonomy to

determine when, where, and how to license their vocal, writing, and musical talents.

Moreover, First Rule possesses extensive industry knowledge and has strong, personal connections with artists throughout the world of music, broadening our moat wider with such vast network effects. Our headquarters are strategically located in Nashville, TN, which is the heart of the music world. Again, this proximity enables us to forge relationships with a wide range of artists, industry insiders, studios, producers, and labels who share our vision for the future of AI music generation and protection.

1. **Innovation in Personalization:** First Rule's use of Melodic Voiceprints as digital assets allows artists to write dynamic lyrics with our AI Co-Writer, a truly unique and cutting-edge collaborative service that blends AI and creativity.
2. **Revenue Enhancement:** By leveraging famous artists' melodic voiceprints along with their AI Co-Writer, emerging artists can achieve significant revenue growth, as evidenced by successful collaborations. This value proposition extends beyond mere creativity, driving tangible financial results. We see an opportunity for artists to capture and generate novel revenue streams where they previously have lost revenue to copy-cats. Imitators will inevitably rip off great artists' sound and style without even stealing their inspiration's voiceprint, but now artists will be able to more directly profit off of this common occurrence.
3. **Targeting Established Artists:** Focusing on famous singers as primary adopters positions First Rule in a niche market with a significant influence on trends and public opinion. This strategic focus on key influencers can lead to wider market penetration.
4. **Integration and Collaboration:** By partnering with integration points like EastWest Sounds' vocal sample libraries and other content generation avenues, First Rule offers a comprehensive and unique ecosystem for music creation. This integration sets First Rule apart from competitors who may offer isolated or fragmented solutions.
5. **Tailored Solutions:** First Rule offerings are not one-size-fits-all. From boutique artist model generations to specific song content generation and attributing the associated rights, these solutions are highly customizable,

catering to the unique needs and aspirations of individual artists and publishers' entire catalogs.

Conclusion:

First Rule's competitive edge lies in its innovation, targeted approach, integration, and commitment to delivering real value to both established and eventually, emerging artists. These advantages position First Rule as a unique player in the market, offering specialized solutions that are designed to enhance creativity, secure and share digital assets, and drive revenue growth for its users. The company's strategy, technology, and vision align to create a strong value proposition that sets it apart from other competitors in the field.

We aim to be the driving force behind this new wave by building and acting as the highway, plumbing, and deepfake checkpoints of the voiceprint and generative music economy, providing artists with an entirely new pie to partake in. As we continue to innovate, even the policing of our artists' voiceprints and Co-Writer™ generations will become an automated process for us.

Expectations

Forecast

In December 2023, we anticipate that our revenue will begin to flow from various sources. This includes the income generated from onboarding and initiation costs, as well as the proceeds from percentages of artist-issued melodic voiceprints and AI Co-Writer™ masters + licensing agreements.

Our projection for November into December is to onboard 15 artists. Following this, we anticipate a monthly subscription fee of \$1,000 for each artist onboarded after that. We want to reward our early adopters (first 15) by waiving their onboarding fees and monthly fees for the first year. Moreover, we anticipate that roughly 50% of our artists will express interest in our boutique model training program for the creation of their bespoke AI Co-Writer™ model, which entails an initiation fee of \$1,500 and a 5% profit structure per subscription.

Initially, we estimate that each artist will generate \$5,000 in revenue per month. However, this figure is expected to increase to \$10,000 per artist per month as we achieve a remarkable 200% growth in our artist clientele starting from February 2024.

Financial Highlights by Year

Financing Needed

Our goal is to secure \$500K at a \$4M pre-money valuation in a pre-seed round which will be matched by an agile software development team which has offered that + scaling our prototype to a sellable product. From there, we'll enter a seed round where we'll aim for a rollup deal which will involve possibly acquiring two music tech startups that have already developed and launched their products. By leveraging their existing technology, we aim to accelerate our growth and scale rapidly.

Specifically in the near term we need financing for the following --

- 1) Outreach to potential artist partners to shepherd us through our initial rollout

- 2) Specialized blockchain, AI, and front end engineers to blitz scale the product and bring all the features, particularly the voiceprint NFTs and the boutique models to market.
- 3) In addition to engineering needs, we will need legal advisors to help us navigate the potential legal issues surrounding artist protection and label relationships.
- 4) We will need core administrative, technical, marketing, and sales support as well as liaisons with potential mergers and roll-ups that we want to initiate as soon as possible.
- 5) For a clearer idea of the near and longer term projected expenditures, reference the detailed profit and loss metrics included in this plan.

Opportunity

Problem & Solution

Problem Worth Solving

Problem Worth Solving

In the rapidly evolving landscape of generative AI in the music industry, artists often find themselves lacking control over three crucial aspects: Compensation, Credit, and Consent.

Our Solution

First Rule addresses this problem by empowering artists with tools and platforms that return control to their hands. Our ecosystem, comprising Artist Vault™, Co-Writer™, and ClearVoice™, not only secures and monetizes voiceprints, but also fosters AI-assisted musical creativity and manages rights for AI-generated works, respectively. This aligns with our '*Humans First*' motto, ensuring artistic autonomy and fair compensation.

Target Market

The global music industry- in net revenues, which account for the share taken by rightsholders- is estimated at \$65.1 billion 2023 in annual revenue, and it's seeing a surge in vocal asset licensing and monetization as well as generative music content creation, especially from well-known artists.

We primarily focus on two key segments:

1. Aspiring-to-established-to-famous singers, offering them control and creative freedom in monetizing their unique vocal styles

2. Voiceprint integrators/fans, including music producers, independent music publishers, interactive media companies, and hobbyists. Competition

Current Alternatives

Controlla.XYZ allows fans to interact with and remix songs from their favorite artists. While an innovative concept, Controlla.XYZ **does not enable new revenue streams from those assets**.

Elf.Tech utilizes AI to transform users' voices into the style of popular artists like Grimes. However, **Elf.Tech does not provide a platform for artists to share, monetize, or gain insights from their vocal assets**. The technology is limited to impersonating established artists' voices rather than enabling new creative works from artists' actual vocal assets.

Voice-Swap.AI also relies on AI to swap users' voices for those of popular singers. **Like Elf.Tech, Voice-Swap.AI does not work with artists' own vocal assets or support artists in building new revenue streams and fan connections from those assets**. The platforms are more focused on vocal impersonation than empowering artists with control over their creative works.

Mint Songs allows artists to sell songs as NFTs, providing some control over distribution and earning potential. However, **Mint Songs does not specifically focus on vocal assets, provide a platform for sharing and monetizing those assets, or generate insights from their use**. While an interesting concept for song ownership and distribution, Mint Songs lacks First Rule's comprehensive solution centered on amplifying the value and impact of artists' vocal creativity.

Kits.AI allows you to generate your own AI voices in one click, or transform your voice using our growing library of officially licensed AI voices, **yet some of their**

library's user-created voiceprints are illegally ripped voiceprints, clearly indicating a lack of security even though they boast being on-chain.

In contrast, First Rule provides an all-in-one exclusive platform for artists to upload, protect, share, and monetize their vocal assets. First Rule's solution generates insights into how those assets are being used to build connections between artists and voiceprint-integrators and fans. With this innovative approach focused specifically on vocal assets + our proprietary Co-Writer tool, **First Rule offers artists greater control, ownership and earning potential from their creative works.**

Our Advantages

First Rule's Key Advantages:

1. **Innovation in Personalization:** First Rule's use of Melodic Voiceprints as digital assets allows artists to write dynamic lyrics with our AI Co-Writer, a truly unique and cutting-edge collaborative service that blends AI and creativity.
2. **Revenue Enhancement:** By leveraging famous artists' melodic voiceprints along with their AI Co-Writer, emerging artists can achieve significant revenue growth, as evidenced by successful collaborations. This value proposition extends beyond mere creativity, driving tangible financial results. We see an opportunity for artists to capture and generate novel revenue streams where they previously have lost revenue to copy-cats. Imitators will inevitably rip off great artists' sound and style without even stealing their inspiration's voiceprint, but now artists will be able to more directly profit off of this common occurrence.
3. **Targeting Established Artists:** Focusing on famous singers as primary adopters positions First Rule in a niche market with a significant influence on trends and public opinion. This strategic focus on key influencers can lead to wider market penetration.
4. **Integration and Collaboration:** By partnering with integration points like EastWest Sounds' vocal sample libraries and other content generation avenues, First Rule offers a comprehensive and unique ecosystem for music

creation. This integration sets First Rule apart from competitors who may offer isolated or fragmented solutions.

5. **Tailored Solutions:** First Rule offerings are not one-size-fits-all. From boutique artist model generations to specific song content generation and attributing the associated rights, these solutions are highly customizable, catering to the unique needs and aspirations of individual artists and publishers' entire catalogs.
6. **Strategic Acquisitions:** With plans for roll-ups like Controlla.XYZ and Emvoice, First Rule demonstrates an aggressive growth strategy that aims to rapidly scale and consolidate key technologies and market positions.

Conclusion:

First Rule's competitive edge lies in its innovation, targeted approach, integration, and commitment to delivering real value to both established and eventually, emerging artists. These advantages position First Rule as a unique player in the market, offering specialized solutions that are designed to enhance creativity, secure and share digital assets, and drive revenue growth for its users. The company's strategy, technology, and vision align to create a strong value proposition that sets it apart from other competitors in the field.

We aim to be the driving force behind this new wave by building and acting as the highway, plumbing, and deepfake checkpoints of the voiceprint and generative music economy, providing artists with an entirely new pie to partake in. As we continue to innovate, even the policing of our artists' voiceprints and Co-Writer™ generations will become an automated process for us.

Execution

Marketing & Sales

Marketing Plan

First Rule will leverage an integrated marketing strategy to drive brand awareness and customer acquisition. Our approach focuses on digital advertising, social media outreach, search engine optimization, email marketing, influencer collaborations, and strategic partnerships.

We will invest in targeted online ads across music-focused platforms to reach key audiences, including artists, producers, and industry leaders. By optimizing ad content and placements, we aim to generate interest and drive traffic to our website and social media profiles.

Our social media profiles on Instagram, Twitter, and LinkedIn will feature regular posts with insights, updates, and content that resonate with the music community at large. By posting daily and engaging actively with our followers, we will establish First Rule as an authority and standard in our industry.

Optimizing our website for search engines like Google will increase our visibility in organic search results for relevant keywords. We will also develop and distribute educational content, including blog posts, videos, and downloadable resources. This content will improve SEO and provide value to our target customers.

Through regular email newsletters, we will keep subscribers up to date with company news, platform updates, resources, and success stories from customers. Newsletters will increase brand recall and give recipients a reason to re-engage with our website and social media profiles.

Collaborating with 25 music artists and producers as official brand ambassadors will amplify our marketing reach. These influencers will promote First Rule to their followers across social media and at industry events. In exchange, we will provide them with access to our platform and promotional opportunities.

First Rule's unique logo and visual identity will give us a professional, polished brand image while Artist Vault's custom brand, which will be developed with Brother's Design Co. and possibly Luum Studios will embody our secure and protective platform and overall ecosystem. We'll apply this branding consistently across all marketing materials and digital presences to build brand recognition.

Self-selection will be a major PoS-stage focus of our tiered marketing campaigns (and Sales tactics); Basic, Premium, and Platinum tier subscription options to Artist Vault will be accompanied by short video-thumbnails that help our potential adopters visualize/play out the journey of an ideal customer using that tier's offered services.

- **Tiered membership lets us categorize the benefits we offer in separate groups.** We'll get to make some features available for a lower price to Basic-tier *aspiring artists* while making the other features exclusive for premium members such as *established* and *famous artists* (C/B to A-list level). At the same time, it gives your members the freedom to choose what they want.

With a strategy focused on resonating with the different levels of our target customers through multiple touchpoints and sales + marketing channels & funnels, First Rule is poised to become a leader in the music industry. By delivering real value to artists, businesses, and other music professionals, we'll achieve sustainable growth and success.

Sales Plan

For First Rule, the sales process is deeply entwined with providing value and ensuring customer satisfaction at each touch point. Our primary focus is on targeted B2B sales with famous singers initially. Here's how we plan to turn prospects into paying customers:

1. **Lead Qualification:** Once an artist shows interest, our Business Development team will qualify the lead by assessing their needs and how First Rule can specifically address them.
2. **Product Demo:** The next step would be to arrange a product demonstration where we can showcase our technology and its benefits in real-time. This

will be a tailor-made presentation, focusing on how First Rule can help them secure their vocal signatures, train & create lyric & music-writing AI models (*Co-Writer*), and issue melodic voiceprint NFTs.

- Subscription Tier Thumbnail Demo (*See: Marketing Plan*)
- 3. **Custom Proposal:** After the demo, a custom proposal will be sent, which will include a pricing model that best suits the artist's needs. We'll make it flexible to accommodate the different revenue streams that artists have.
- 4. **Onboarding and Training:** Once the artist agrees to the proposal, we will provide comprehensive onboarding and training to help them get the most out of First Rule.
- 5. **Account Management:** Each artist will have a dedicated account manager who will be responsible for nurturing the relationship, ensuring customer satisfaction, and exploring upsell or cross-sell opportunities.
- 6. **Closing and Follow-Up:** The deal is considered closed when the artist starts using First Rule for their work. We will continually follow up to gather feedback and make any necessary improvements.
- 7. **Customer Success Team:** This team will work on maximizing customer lifetime value, monitoring artist engagement with First Rule, and proactively identifying any issues that could lead to churn.

Staffing Needs:

- Business Development Team for lead qualification and initial reach-out
- Account Managers for maintaining relationships
- Customer Success Team for post-sales activities

Commission Structure: We will operate on a tiered commission structure, rewarding those who meet or exceed quotas.

Sales Activities:

- **Networking at industry-specific events:**
 - Attend music industry conferences like SXSW, Midem, and AIMM Con to connect with artists, producers, labels, and managers.
 - Host sponsored stages, panels, or networking events at major music festivals to increase brand visibility.

- Leverage existing relationships with influencers to gain introductions to new prospects.
- **Engaging with referrals:**
 - Offer referral bonuses to incentivize existing customers to connect us with artists in their network.
 - Send personalized outreach to referred prospects that highlights the referring customer's positive experience.
 - Prioritize referred leads during lead qualification since they come pre-vetted.
- **Existing customer follow-ups for upsell or cross-sell opportunities:**
 - Check in regularly to gauge satisfaction and explore additional needs we can fulfill.
 - Educate on new features or products that could augment their usage.
 - Offer special bundled pricing or discounts for existing customers adding services.
- **Thought leadership through webinars, articles, etc., to establish First Rule as an industry innovator:**
 - Host webinars showcasing First Rule's capabilities to prospects.
 - Publish bylined articles in music industry trade publications.
 - Speak at industry conferences about AI-enabled content creation and IP protection.
 - Promote thought leadership content through owned channels and social media.

We're well-equipped to build and maintain a robust sales pipeline and ensure a high conversion rate of prospects into satisfied, paying customers.

Operations

Locations & Facilities

Currently, First Rule is based in Nashville, TN, and operates in a decentralized manner with all team members working remotely. Our vision is to establish a presence in the vibrant Music City by making use of shared office spaces. These spaces will not only provide cold storage options for our clients but also offer a flexible workspace where our staff can periodically gather to collaborate as a cohesive team.

Technology

In our current phase, we've focused on building a demo product that combines a Streamlit UI and a pythonic backend. This initial version serves as a foundation for the future development of a full-stack application that can support both web and mobile platforms. Our ultimate technology-related goal is to create a comprehensive platform and secure ecosystem that seamlessly integrates robust AI model training capabilities with the power of blockchain technology + databases, as well as integrations/plugins with DAWs and other music studio software.

Equipment & Tools

We currently operate using our local machines, but as we expand, it is essential for us to have a reliable source of GPU processors. These processors can be either physical or, more likely, cloud-based, to facilitate the training and maintenance of our AI models. Additionally, we will need a secure solution for storing our partner artists' private blockchain keys in cold storage. Furthermore, we will require cloud storage for the melodic voiceprints themselves to ensure their accessibility and protection.

Milestones & Metrics

Milestones Table

Milestone	Due Date	Who's Responsible	Details
Functional demo completed	Completed	Dave T	Functional demo completed, ready to shop to potential partner artists and ready to scale as new engineers are brought on.
New leadership onboarded.	Completed		Flex C-Suite exec, CFO / COO onboarded to assist with rapid scaling.
Team members onboarded	November 27, 2023		Advisors and investor relations exec onboarded to explore.
Pre-seed Financing Secured	December 11, 2023	Founding Team	An initial round of financing to secure the capital for rapid expansion and execution of our plan to blitz-scale.
Initial Artist Partners Onboarded	December 17, 2023	Founding Team	Initial partner artists / evangelists secured, scout and marketing teams in place for artist outreach and communication.
CTO and engineering team build out	December 28, 2023		As we scale, more engineering talent and oversight will be critical, thus requiring new team members to be onboarded.
Boutique Models Training Begins, MV and NFTs rolled out	January 01, 2024	CTO	Once the initial artists have been secured, we will begin boutique model training and enhanced blockchain MV protection protocols.

Launch and Initial Adoption	January 11, 2024		<ul style="list-style-type: none"> - Launch the Artist Vault™ platform with early-bird promotions for artists to upload voiceprints. - Partner with 5-10 emerging artists for exclusive Co-Writer™ training sessions and/or contests.
Expansion within Music Industry	February 26, 2024		<ul style="list-style-type: none"> - Grow user base: Launch North American marketing campaigns targeting independent artists. - \$5K/mo on PR - Introduce new features in the Artist Vault, such as advanced analytics for artists to track voiceprint usage.
Exit [Scenario 1]	November 28, 2025		<ul style="list-style-type: none"> - Acquisition by a larger music or tech company, possibly Nvidia, with whom we already have connections. - Licensing the technology for use in other industries.
Exit [Scenario 2]	February 23, 2026		<ul style="list-style-type: none"> - Strategic partnership or acquisition with a major entertainment company; Possibly a PRO
Exit [Scenario 3]	December 01, 2027		<ul style="list-style-type: none"> - IPO

Key Metrics

At First Rule, we have established the following key performance indicators (KPIs) to track our progress:

Artist Vault Acquisitions:

Our goal is to onboard 500 artists in our first year who complete voiceprint registration and upload samples to their Artist Vault. This metric indicates market traction for our core value proposition.

Subscription Conversion Rate:

We aim for a 10% conversion rate from platform visitors to paying subscribers of our Full Studio Access service. This will validate product-market fit.

User Engagement:

We will track the frequency of Co-Writer interactions and satisfaction ratings. Our target is an average of 2 sessions per week with 75% user satisfaction.

Cash Reserves:

Maintaining reserves equal to 6 months of operating costs allows us to withstand market fluctuations and invest in R&D.

Customer Retention:

Keeping churn below 2% per month indicates our customers find ongoing value in our platform.

By monitoring these metrics, we can course-correct and optimize our go-to-market strategy. Our success hinges on driving value for artists and fans.

Company

Overview

First Rule is a DBA for SpokeTek, Inc, a Delaware C-Corp. Rule 1 is owned by Joel Robert Kaiser, Dave S. Thomas, and Robert Baker.

Team

Management Team

Dave S. Thomas - Co-Founder | CTO/Chief Magic Officer

Skills and Experience: Dave brings a wealth of experience in tech entrepreneurship and innovation. He has a strong background in hospitality, operations management, and music technology. He has

Role: Dave will focus on strategic leadership, technology vision, and operational guidance. His in-depth industry knowledge and innovative mindset will drive the product development and growth strategy.

Strengths: His blend of technical expertise and creative thinking makes him a driving force behind First Rule's unique value proposition.

Joel Robert Kaiser - Co-Founder | Co-CEO

Skills and Experience: Joel has a diversified background in business management, design, branding, marketing, and the entertainment industry as a forerunner/founding member/initial design-lead & street teams manager of a 6-year music and arts festival that scaled to 6K+ ticket sales in Central VA between 2013-2018. He has worked with numerous artists and corporate clients as a 15+ year freelance graphic design professional and has a keen understanding of the music business landscape. He also holds a Bachelor of Science in Graphic Design from Liberty University.

Role: Joel will oversee marketing, artist relations, and business expansion. His hands-on experience with artist management will guide the development of tools tailored to the needs of singers.

Strengths: Joel's strong network and deep insight into the music industry position him as a critical player in navigating the intricate dynamics of the music world.

Rob Baker - Co-Founder | Co-CEO

Skills and Experience: Rob is a two-decade veteran of the music industry in Nashville, with almost 12 years as an entertainment attorney and another 12 as an artist manager. After practicing corporate law at Waller, Lansden, Dortch and Davis, Rob became the managing partner of his own firm and led a practice that included multi-platinum artists, writers, producers, executives, independent record labels and music publishers before establishing and chairing the entertainment group at Bone, McAllester, Norton. In 2011, Rob shifted gears, began managing artists full-time and grew Longshot Management into a successful boutique management company, whose artists boasted multiple number 1 songs and albums, multi-million dollar tours and partnerships and took home CMA, ACM, CMT, BMI and ASCAP awards.

Role: Rob will provide seasoned leadership and utilize his extensive network of executives, artists, writers, producers and service providers in the entertainment industry to onboard artists, writers and users to scale the growth of First Rule.

Strengths: Extensive experience and relationships as a trusted advisor in the music and entertainment industry. Rob has founded and led two successful companies from inception to high profitability.

Conclusion

The First Rule management team is a well-rounded blend of skills and expertise, uniquely positioned to capitalize on this market opportunity. Their combined experience in technology, music, legal affairs, and business development equips them to navigate the complexities of this innovative venture. The synergy among the team members amplifies First Rule's strengths, positioning the company as a

leader in transforming how vocal assets are managed and experienced in the music industry.

Advisors

Larry Bridegsmith - AI & Blockchain Advisor

Skills and Experience: Larry is an expert in artificial intelligence, blockchain technology, and legal affairs. His experience spans multiple successful projects involving complex technological solutions and legal structures.

Role: Larry's advisory role focuses on ensuring that First Rule's technology is cutting-edge, secure, and compliant with legal regulations. He guides the integration of AI and blockchain into Rule 1's offerings.

Strengths: His blend of technological know-how and legal acumen is instrumental in building a robust, trustworthy platform.

Taylor Cason - Business Development and Industry Relations Advisor

Skills and Experience: Taylor has an extensive background in business development and has strong ties within the music industry through his father Buzz Cason, founder and owner of the famous Creative Workshop and the Friendly Forest studio. His brother Parker is also an engineer and manager at CW. Taylor has experience in forging successful collaborations and identifying growth opportunities outside of music as well, first connecting co-founders Dave and Joel.

Role: Taylor will focus on cultivating industry relationships, identifying strategic partners, and steering business development efforts to ensure First Rule's growth and market penetration.

Strengths: Taylor's knack for relationship-building and keen music-business acumen make him pivotal in expanding First Rule's reach and influence.

Taylor Duncan -

Skills & Experience:

- Demonstrated history as an executive in the staffing and recruiting industry.
- Strong foundation in Sales, Team Building, Direct Sales, and Leadership.
- Holds a Bachelor's degree in Finance from University of Illinois at Urbana-Champaign.

Roles:

- Provides guidance on key business challenges and pivotal decisions.
- A mentor for growth and outreach strategies.
- Advises on financial strategies to align with industry best practices.

Strengths:

- In-depth understanding of team dynamics and cohesion, crucial for platforms like First Rule.
- Proven track record in business development and sales, ensuring effective market penetration.
- Academic credentials that emphasize a methodical and analytical approach to finance and strategy.

Financial Plan

Forecast

Key Assumptions

First Rule's projected revenue and operating costs have been developed based on the following key assumptions:

Revenue Streams

- Melodic Voiceprint NFT (MV-NFT) Contracts: We estimate these licenses to generate substantial revenue, reflecting a % fee on each MV-NFT issued and licensed out.
- Initiation and Management Fees: Recurring revenue will come from initial onboarding and ongoing profile management fees for artists.
- Physical USB Key Sales: Revenue will be generated from sales of secure physical storage keys for MV-NFTs, appealing to security-conscious artists.
- Content Creation and Integrations: Partnerships to develop artist avatars and content, e.g. a 'Happy Birthday' track using famous artists' melodic voiceprints, will open new revenue channels.
- Boutique LLMs trained on singers', singer-songwriters', and songwriters' catalog data = *Co-Writer* AI model

Growth Assumptions

We anticipate gradual growth given the newness of our offering and the need to build trust. Focusing first on well-known artists will drive further adoption.

Major Expenses

- Brand Ambassador Acquisition: Pop-ups backstage at award shows, festivals and other trade events will build awareness and help in acquiring early adopters after we launch our beta version and open our pilot program.
 - Developing and delivering pass codes (physically and electronically) to 250 initial adopters for exclusive functional demos of our platform.

- Staffing: Engineers, support, executives, and marketers will make up a substantial part of operating expenses.
- Acquisitions: The purchases of Controlla.XYZ, Emvoice, and Suno.AI should be viewed as key strategic investments.

Profit Expectations

We expect profitability to correlate with platform adoption, backing our brand messaging of being the new industry standard, and development of native and downstream marketing opportunities. Conservatively, we forecast running at a loss for 18–24 months, but with an aim to generate revenue as early as December of 2023.

In summary, First Rule's projections indicate an innovative, opportunity-rich venture poised for strategic growth. Aligning with industry trends and addressing unmet needs positions us uniquely. Continuous revenue streams and one-off opportunities create balance, supported by investment in ambassadorship and talent.

While challenging, First Rule's originality and fit with the current art and tech landscape make it a promising investment. Projections match trends and endorse a model that resonates with stakeholders.

Revenue by Month

Expenses by Month

Net Profit (or Loss) by Year

Financing

Use of Funds

First Rule's Utilization of \$500K in a Pre-seed Round with a Valuation of \$4M

Description: We will invest in research and development of our Beta versions of-

- Securing / creating voiceprints
- Integrating blockchain technology
- Reverse-audio search for natively comparing deepfakes to the vector of our artists' voiceprints
 - Developing an API for scraping the entire internet for AI-generated voiceprint deepfakes
- Development of the Melodic Voiceprint NFT contracts
 - Visual certification
 - Green check mark
 - On-chain certification

- Authentication measures for artists' profiles
- Boutique training of AI Co-Writer LLMs
 - Multimodal collaborative interactions
 - Text-to-Speech
 - Speech-to-Speech
 - Music-to-Music

Benefit: This investment will enhance and innovate our product offerings, with the goal of having industry-leading technology, security, and scalability.

Seed round of \$5M-\$6M USD Raised:

Description: We will invest in research and development of scalable versions of Beta version

Product Development and Technology Integration (\$1.5M-\$2M):

- Development of AiLias for artists
 - End-user utilized Co-Writer masters owned entirely by artist(s)
- Secure plugin for DAWs (Digital Audio Workstations)

Marketing and Brand Ambassador Program (\$800K-\$1M):

Description: We will expand our marketing efforts, including the introduction of Artist's Vault Intro Packages and engagement with 100 key brand ambassadors. Content marketing and artist-led contests will engage fan bases and other famous-tier singers through these partnerships. Eventually, we'll also begin marketing to a separate market via a separate division; rising / aspiring artist users.

Benefit: This initiative will increase brand awareness, stimulate adoption among artists, and contribute to the growth of our customer base.

Personnel and Talent Acquisition (\$800K-\$1M):

Description: We will hire key roles such as engineers, support staff, C-suite executives, and marketers.

Benefit: Building a talented team will enable us to execute our vision, provide excellent customer support, and drive growth.

Operational Expenses and Scaling (\$400K-\$600K):

Description: These funds will cover the costs of daily operations, legal and compliance requirements, office space, and other essential functions.

Benefit: This allocation will support smooth and sustainable growth, ensuring that our foundation is strong as we scale.

Capital Expenditures and Infrastructure (\$300K-\$400K):

Description: We will invest in critical equipment, technology infrastructure, and any necessary physical assets.

Benefit: This investment will ensure the stability, performance, and resilience of our platform and services.

Contingency and Future Opportunities (\$200K-\$400K):

Description: We will maintain a reserve for unforeseen expenses or strategic opportunities that may arise.

Benefit: This allocation will provide us with financial flexibility and risk mitigation.

Conclusion:

First Rule's strategic allocation of the raised funds is designed to fuel our vision, enable blitz scaling, and build a robust and innovative platform in the music industry. By investing in acquisitions, technology, marketing, talent, and infrastructure, we aim to position First Rule as a leader in the space and deliver value to both our customers and investors. Our approach is not only aligned with our mission but also carefully crafted to drive revenue growth, increase market share, and maximize return on investment for our stakeholders.

Sources of Funds

First Rule is seeking an initial pre-seed round of \$500K to launch and scale our platform. This will be matched by our technical partners who will contribute an additional \$250K along with their expertise building scalable AI and blockchain platforms. We have applied for an additional \$250K from InvestTN's Regional Seed Fund which combined with the matching funds would fully capitalize our initial pre-seed needs.

Our pre-seed round will enable us to build an initial functioning platform to migrate our early beta users onto and complete further core technology development. We will use this to establish product-market fit and prepare for a follow-on seed round of \$5M to \$6M to rapidly scale up the platform and user base globally.

First Rule is committed to a lean startup approach. Our pre-seed raise is prudently sized to prove core assumptions before raising larger rounds. We have assembled an experienced team that has repeatedly built startups frugally to profitability prior to exit. Our matching technical partners share this experience scaling startups on a budget.

Beyond investment, our team and partners contribute significant sweat equity. We will remain disciplined in our spending and operations to maximize the impact of funds raised. Investments will focus on technology and reaching initial core milestones to set up a successful seed round.
